

BIMForum Highlight: Engineering to Installation - Concrete

Thurs. Jan 14th, 2010
11:00a-11:45a
Arizona Grand Resort
Phoenix, AZ

Another great presentation at the BIMForum in Phoenix next week, please join us, there is still space!

Synopsis

This Presentation is based on KLORMAN CONSTRUCTION's Real World Experience and success by using Building Information Models (BIM) and Virtual Design and Construction (VD&C) to (i) Enhance Design Coordination; (ii) Enhance quality of workmanship; (iii) Reduce Costs and; (iii) Advancement of the Construction Industry. KLORMAN has reaped great benefits from developing, enhancing and using this emerging technology. KLORMAN demonstrates new approaches and applications, strategies for improvement, cost savings and innovation as a recognized leader in VD&C.

Speaker

William Klorman, a Licensed General and Concrete Contractor, specializes in Design Build Parking Structures, has been personally involved in the construction of nearly 300 existing commercial structures over 30 years. Active in ACI on local and national levels, including past chairmanship of the Board Committee on Responsibility in Concrete Construction and member of ACI's 131 Building Information Modeling of Concrete Structures. Bill has been a major factor in promoting the design and construction of quality structures. His innovative and successful techniques which include Virtual Design & Construction (BIM) in the planning and execution of all types of major construction have been inspirational for all involved in the design and construction of buildings.
