2017 Constructech Vision Awards Honor Forward Thinkers in Construction

CAROL STREAM, III – August 15, 2017

Tackling a problem on the jobsite is never easy, but *Constructech* magazine awards the construction teams that have leveraged technology to overcome these challenges.

Constructech magazine is pleased to announce the winners of the 2017 *Constructech* Vision Awards. For the past 18 years, the *Constructech* Vision Awards have celebrated the achievements of construction companies that have leveraged technology in innovative ways to solve operational challenges and improve their bottomlines. Hardware and software providers are also recognized for their dedication and support to their clients.

Each winning company was selected on its ability to implement new solutions that address issues in productivity, maintenance, efficiency, security, data sharing, and so much more. Companies are honored in their category, which includes residential construction, commercial, and heavy construction businesses, professionals in all trades, architectural and engineering, corporate owners, facility management, government agencies, and land developers.

The accomplishments exemplified by this year's winners reinforce each company's desire to remain competitive in the market and drive new innovations that will be integral to them now and well into future.

The 2017 *Constructech* Vision Award winners include:

Specialty Contractor: Concrete Work

Gold: Klorman Construction

FARO

"This year's winners are proving innovation is alive in the construction industry," says Laura Black, editor, *Constructech* magazine. "They are demonstrating how technology can help in a competitive market."

The 2017 Vision Award winners were honored at a dinner last night in San Mateo, Calif. The event served as the finale to *Constructech's* 2017 Technology Day and Baseline to Build On events.

About *Constructech* Technology Day

Constructech Technology Day is a one-day conference that dives into discussions on the use of technology in the construction industry. The conference is open to a wide variety of attendees from project managers, CEOs, students, CTOs, IT directors, professors, and more. Technology Day provides attendees with the opportunity to identify ways to effectively use technology to be most efficient in the office and at the jobsite. constructech.com/tech-day/
