

Our 0.7 EMR for 2018 stands among the lowest of those involved in the design/build construction and structural concrete industry.

* The Experience Modification Rating (EMR) is a gauge of a company's claims history and safety recorded as compared to other companies in the same industry. An EMR rating of 1.0 represents the industry average. The lower the number, the safer the company is rated.

Klorman Construction is committed to providing a safe work place. No single facet of Klorman's operation is of greater importance. The results of these efforts provide a safe work environment, and strongly affects the overall success of our company and our client's projects. Our goal is accident-free work while providing the high level of quality that has been a trademark of Klorman Construction since its founding.
