Carol Stream, Ill. – Oct. 8, 2012 – The industry’s leading construction firms gathered at the San Mateo Marriott in California this past Friday to discover which builders, contractors, and corporate owners would be named this year’s *Constructech* Vision Award winners.

The *Constructech* Vision Awards honor companies that have realized the advantages of applying advanced technologies to their everyday businesses. Companies eligible to participate include residential, commercial, and heavy construction firms, professionals in all trades, architectural and engineering firms, corporate owners, facility management companies, government agencies, and land developers.

The 2012 Vision Awards ceremony was held following *Constructech*’s annual Technology Day event. “The Vision Awards have a steep tradition rooted in honoring the most forward-thinking, innovative companies in the construction industry. Make no mistake, the 2012 winners carry on this stellar tradition,” says Peggy Smedley, editorial director, *Constructech*. “These companies have implemented technology solutions that are improving their businesses far beyond what we could have even imagined just a few years ago. Now, with an eye on tomorrow, they are using technology to serve as a strong foundation as we advance the future of IT in the industry.”

Included among the winners of the 2012 *Constructech* Vision Awards:

Specialty Contractor: Concrete Work

Gold: **Klorman Construction**

Meridian Systems

Tekla

Trimble Navigation

About *Constructech* magazine

As the technology advocate for the construction industry, *Constructech* magazine helps builders, contractors, and corporate owners make informed decisions about software and systems for the office and the field. *Constructech* continues to be a highly respected and trusted resource for construction technology for almost 15 years.
