**KLORMAN CONSTRUCTION BUILDING  
SONY STUDIOS' PARKING STRUCTURE**

LOS ANGELES, CA. – Dec. 22, 2007 --- **Klorman Construction** has been selected to be the design/build general contractor for the 1,015-stall Sony Studios parking structure in Culver City.

Sony Pictures tapped Klorman Construction because of its extensive experience and expertise with regards to parking structures.

The 343,000-square-foot project is six stories tall and will have two traction elevators. A long span beam and slab design with shear walls is being used for the primary seismic system because of the project's proximity to an earthquake fault. Klorman also will provide a cast-in-place Art Deco design to the structure, complimenting the overall look of the existing studio facilities.

"We have long worked with projects that required special features or innovative thinking, and we certainly recognize that some unique steps will be necessary with this structure," said Bill Klorman, president of Woodland Hills-based Klorman Construction. "We're confident we will be able to deliver a quality final product that Sony Pictures will be proud of."

In addition to parking, this structure will serve as the primary audience queuing for TV shows and security guard facilities.

**About Klorman Construction**

Klorman Construction is a Los Angeles-based design/build general contractor and structural concrete contracting company. Founded in 1980, Klorman has earned a reputation for building complex parking structures, multi-level towers and high-end architectural concrete projects. Construction services include design/build, construction management, structural concrete, consulting, value engineering, renovation and project management.

Klorman Construction Corp. has more than 150 projects to its credit, including numerous developments and renovation projects in diverse building types and geographic regions. Its projects include mixed-use retail centers, hotels, office, institutional and medical buildings. The company maintains offices in Los Angeles, San Diego and San Francisco.
