W.M. KLORMAN CONSTRUCTION BUILDING PARKING STRUCTURES AT UCLA'S SOUTHWEST HOUSING COMPLEX

El Monte, Calif., Feb. 2, 2004 W.M. Klorman Construction is building two subterranean parking structures as part of the UCLA Southwest Campus Housing Project between Veteran and Weyburn avenues near Westwood Village. The two- and three-level structures are adjacent to and under two apartment buildings and will provide space for 370 vehicles for the 243 apartment units.

The parking structures are cast-in-place concrete with CMU walls. Site challenges include zero lot line construction adjacent to streets and temporary shoring for below-grade construction.

General Contractor for the project is Gordon & Williams, Irvine. Project architect is Van Tilburg, Banvard & Soderbergh of Santa Monica.

The project is part of UCLA's efforts to provide housing for approximately half of the new, single graduate students. Estimated completion date is August, 2004.

About W.M. Klorman Construction Corp.

W.M. Klorman Construction Corporation is a Los Angeles-based design/build general contractor and structural concrete contracting company. Founded in 1980, W.M. Klorman has earned a reputation for building complex parking structures, multi-level towers and high-end architectural concrete projects. Construction services include design/build, construction management, structural concrete, consulting, value engineering, repair and project management. W.M. Klorman Construction Corp. has more than 150 projects to its credit, including numerous developments and renovation/repair projects in diverse building types and geographic regions. Its projects include mixed-use retail centers, hotels, office and medical buildings. The company maintains offices in Los Angeles, San Diego and San Francisco.
