## **Klorman Construction Selected to Build Foothill Transit's Park n Ride Facility in City of Industry**

LOS ANGELES, CA. – November 1, 2012 -- Adding to its growing reputation among public transit systems, Klorman Construction has been selected as the general contractor by Foothill Transit Authority to build a 620-car parking structure in the City of Industry.

Woodland Hills, Ca. based Klorman Construction will manage the overall construction process of the 5-level, 216,000-square-foot parking structure at 600 South Brea Canyon Rd. This marks another major public transit development that has been recently awarded to Klorman Construction. The company was also the Design/Builder of a three-level, 261 car parking structure in East Los Angeles for the Los Angeles County Metropolitan Transportation Authority. Klorman Construction also is the Prime Structural Concrete Contractor for the new Tom Bradley International Terminal at Los Angeles International Airport (LAX).

Construction of the Foothill Transit Park and Ride Facility Parking Structure in the City of Industry began in October 2012, with completion slated for September 2013. This facility is Foothill Transit's first ever agency-owned Park and Ride facility. Adjacent to Industry's Metrolink train stop and convenient to the 60 Freeway, Foothill Transit's new Industry Park and Ride will provide parking for local residents who are increasingly choosing public transportation for their commutes into downtown Los Angeles.

The design embraces the materials and themes of the neighborhood while promoting Foothill Transit's goals of a dynamic visual experience for those entering the city by rail or car. The facility will have pedestrian plazas, electric vehicle charging stations, secure bike lockers for local cyclists, and solar-powered LED lighting and large art mural. Los Angeles based Walker Parking Consultants is the architect on the project.

### **About Klorman Construction**

Klorman Construction is a Los Angeles-based design/build general contractor and structural concrete contracting company. Founded in 1980, Klorman has earned a reputation for building complex parking structures, multi-level towers and high-end architectural concrete projects. Construction services include design/build, construction management, structural concrete, consulting, value engineering, renovation and project management.

Klorman Construction Corp. has more than 300 projects to its credit, including numerous developments and renovation projects in diverse building types and geographic regions. Its projects include mixed-use retail centers, hotels, office, institutional and medical buildings. The company maintains offices in Los Angeles, San Diego and San Francisco and Washington D.C.
